Summer is here and there is no more school, now how do we stay cool, while conserving our most precious resource?

While finding your favorite ways to beat the heat, please conserve water by reminding your family and friends to follow these simple tips:

- Take shorter showers as a typical shower uses 5 to 10 gallons of water per minute.
- Check faucets, toilets, and sinks for leaks since even a small drip can waste 50+ gallons of water a day.
- Water your lawn during the cool parts of the day.

During this time of “Social Distancing” Metropolitan Water District is offering online Turf Removal and California Friendly Native Plant Landscaping Classes. Now is the time to take an opportunity to register for one of their online classes.
